*FROM FIELDS  
OF KNOWLEDGE  
AND EXPERIENCE*

By 1927 the Board of Education of the Boone Independent School District recognized the growing demand for a college, and on March 21 of that year authorized the establishment of Boone Junior College.

Beginning with an enrollment of 60 freshmen in September of 1927, the college has weathered lean years of the depression and World War II, and has established itself as an integral part of this area.

The students were accommodated in the high school building until the fall of 1955 when the college moved to a separate building with a one and one-fourth acre campus. This was a momentous change. It has made possible an expanded program for academic and extra-curricular activities and the development of a united student body.

In 1965 the Iowa General Assembly passed legislation creating a statewide system of area community colleges. In August of 1966 Boone Junior College was officially designated as an attendance center of Area XI Community College District.

The purposes and aims of the college are (1) to prepare students for entrance to upper division work at a senior college; (2) to provide two more years of formal education for high school graduates who will terminate their education at the Junior College level; (3) to provide for adult students courses for increasing their vocational or cultural knowledge; (4) to provide programs and activities of an educational and cultural nature for the community.

The college believes that man has a right to knowledge and the free use thereof; that in order for man to participate fully in the modern world and in its achievements he needs an understanding of the physical world, the nature of life, and the behavior of people; that man needs not only to improve his basic educational skills but also to develop his reasoning potential to understand the nature of his democratic society.

## *A TASTE FOR KNOWLEDGE*

A bond issue passed on September 12, 1966, provided \$925,000 for the construction of new buildings for Boone Junior College. A federal Higher Education Facilities grant of \$625,000 will supplement the bond issue funds for the new construction. Two buildings are included in this project. The Educational/Administration Building will contain classrooms, the college library, administrative and faculty offices, a student study center, and a 500-seat auditorium.
